SubArc Digital Series

Submerged Arc Welding Power Source

Quick **Specs**

Heavy Industrial Applications

Railcar Shipbuilding Heavy fabrication Pipe manufacturing Pressure vessel

Processes

Submerged arc (SAW) Electroslag (ESW) Air carbon arc cutting and gouging (CAC-A)

Input Power

Requires 3-phase power

Rated Output

DC 650/800: 650 A at 44 V, 100% duty cycle DC 1000/1250: 1,000 A at 44 V, 100% duty cycle AC/DC: 1,000 A at 44 V, 100% duty cycle

SubArc Digital Series

- Choice of three power sources, three interface controls and a range of wire drive motors and accessories.
- Digital process control technology.
- Highly reliable thyristor power regulation.
- Digital control and communication electronics improve weld performance and simplify the integration of the equipment in more advanced applications.

SubArc DC 650/800 Digital

Easy to integrate.

Our SubArc power sources are easy to integrate by using

Two DC power source models and one AC/DC power source model.

Power sources have sufficient power capacity to cover applications from traditional DC single-arc to multi-wire tandem welding. In the case of electroslag welding or other high-current demand, two or more power sources can easily be paralleled (both DC and AC/DC machines).

Power source is warranted for three years, parts and labor. Original main power rectifier parts are warranted for five years.

Easier setup and operation.

The SubArc Digital Series interface controls recognize the power source and wire drive connected, and automatically configure the system for proper operation. The easy-tounderstand interface provides the operator with the necessary controls to set process parameters and control output. The power sources feature simplified parallel and tandem setups - just plug the cable into the appropriate connectors.

Improved flux delivery system.

Our SubArc flux hopper utilizes a flux valve mechanism that assures continuous delivery of flux to the arc. The unique valve design provides a barrier between the flux and actuation device to help prevent jamming of the solenoid actuator due to dust and debris. A sight glass is provided on the front of the flux hopper allowing the weld operator to visually monitor the remaining flux in the hopper.

Low-voltage accessory operation and improved environmental protection. The digital series accessories are powered with 24 VAC control voltage from the power source. All power sources, interface controls and wire drives are IP23 rated providing a high level of protection for harsh environments.

All power sources also feature thermal overload protection, line voltage compensation and Fan-On-Demand™

SubArc DC Digital

SubArc DC 650/800 Digital and DC 1000/1250 Digital

cover most single- and twin-wire applications. These traditional transformer/rectifier power sources combine high efficiency with the highest reliability. They also feature state-of-the-art digital-control electronics to provide best-in-class welding performance and repeatability.

SubArc DC Digital Specifications (Subject to change without notice.)

SubArc AC/DC Digital

SubArc AC/DC Digital and SubArc AC/DC 1250 Digital. AC welding output enables the SubArc AC/DC to be used in tandem-arc welding systems with a DC lead arc and AC trailing arc, or with AC/AC arc combinations. Using multiple arcs increases deposition rate, resulting in shorter welding cycles for very thick weldments without compromising quality. All AC balance control modes can be set on the SubArc Interface Digital

or the SubArc Remote Pendant Digital. These easy-to-understand interfaces include two DC modes and 12 best-practice AC balance settings. In multiple-arc configurations, the system automatically adjusts the phase shifting between power sources thereby eliminating arc interaction. There is no need to employ a laptop PC for complex wave shaping before operation.

SubArc Interface and Remote Operator Interface Setups

SubArc Interface Setup

The positive sense lead is integrated in the wire feeder motor cable and control cable. A customer supplied negative sense lead is required for optimal performance.

SubArc Remote Operator Interface Setup

SubArc Modbus® Setups

Easy Method Modbus All other items Integratorcommunication in system: supplied positioner, interface rolls, etc. Flux hopper SubArc SubArc Interface DC or AC/DC Control Digital power source cable Wire or Analog drive Work -VS

Easy method of integrating standard components while controlling them over Modbus communication. Using the standard SubArc interface, wire feed motor and flux hopper, an integrator can remotely adjust settings and operation of the SubArc interface. A separate document with interfacing information is available.

High-Level Method

High-level method where the integrator solely uses the digital power sources and controls them over Modbus communication. Benefits from Miller technology-driven arc performance while integrating into a custom-made welding solution.

SubArc System Parallel and Tandem Setups

Parallel setup. Only like power sources can be paralleled. Paralleling of two machines to increase maximum welding current is simply done by connecting the paralleling cable from RC2 on the first unit to RC1 on the second unit. This works for both DC as well as AC/DC machines. Daisy chaining multiple machines to gain higher output is done in the same way. No special tools, laptop or software needed... plug and play.

Tandem setup. To use two or more AC arcs, the arc must be phase shifted to prevent arc to arc interaction. This is simply done by connecting the tandem cable from RC2 on the first unit to RC3 on the second unit. This automatically sets the optimum phase shift for AC welding. No special tools, laptop or software needed... plug and play.

301143 Short, 11.3 in. (288 mm)

301144 Long, 16.8 in. (427 mm)

1,200 amps at 100 percent duty cycle.

For 3/64-3/32 inch (1.2-2.4 mm) wires.

1200-Amp Twin-Wire Torch Contact Tips

264595 3/64 in. (1.2 mm)

264596 1/16 in. (1.6 mm)

264597 5/64 in. (2.0 mm)

264588 3/32 in. (2.4 mm)

30-90 mm External Cladding Head 301167

3,000 amps at 100 percent duty cycle. For 30-90 mm strip. Water-cooled external cladding head is for use with submerged arc and electroslag cladding. See literature AY/52.0

for more information.

Accessories (continued)

Single-Wire Straightener 199733

For use with OBT 600, OBT 1200 and 1200-amp single-wire torches. For 1/16 – 3/16 inch (1.6 – 4.8 mm) wires.

Twin-Wire Straightener 301160 Single adjustment 301162 Double/separate adjustment For 1200-amp twin-wire

torches only.

SubArc Flux Hopper Digital Low Voltage 300942

25-pound-capacity flux hopper with automatic flux valve. The opening is sized to allow hook-up of any flux-hoppermounted recovery system. Includes slag screen and 11-foot (3.3 m) power cable.

Wire Reel 108008 For 60-pound (27 kg) coil of wire. Requires Spool Support Assembly (119438).

Spool Support Assembly 119438 For 60-pound (27 kg) wire reel.

Manual Slide 301137

Manual slide for smooth and accurate movement of the welding head. Slide allows for 7.87 inch (200 mm) travel adjustment with load capacity of 220 pounds (100 kg) at 1.64 feet (500 mm). **Not recommended for tandem.**

SubArc Single Mounting Bracket 301134 Single mounting bracket configures single-arc welding head to mount to manual slide.

SubArc Tandem Mounting Bracket 301135

Tandem mounting bracket is a predesigned welding head configuration for tandem applications. Independent adjustments of lead and trail torches adapt to most applications.

SubArc Mounting Hinge 301136

Mounting hinge allows welding head to swivel 90 degrees with minimal effort. Ideal for changing from longitudinal to circumferential welds.

SubArc 3-Wheel Tractor Digital Package 951714

SubArc 3-Wheel Tractor package includes SubArc 3-Wheel Tractor, SubArc Tractor Interface (weld and travel control), SubArc Wire Drive 400, 10-pound (4.5 kg) capacity manual flux hopper with valve, 60-pound (27 kg) wire reel, OBT 600 torch and wire straightener. See literature AD/7.7 for more information.

SubArc Portable Welding System

951675 With SubArc DC 650 Digital 951676 With SubArc DC 1000 Digital 951677 With SubArc AC/DC Digital

SubArc Portable Welding System is a ready-toweld submerged arc system for pressure vessel, pipe and welding that requires positioning equipment which can adapt to your application. See literature AD/7.6 for more information.

Welding Intelligence™

14-pin Insight Core™ Module 301072

Insight Core is a simplified, internet-based industrial welding information management solution that monitors and reports welding activity for basic productivity and quality metrics. Requires Insight Core to SubArc Digital Series Adapter (301295). See Insight Core brochure (266011) for more information.

Insight Core™ to SubArc Digital Series Adapter 301295

ArcAgent™ Auto 301346

See literature WI/1.0 for more information.

Typical Installations (SubArc Interface and Remote Operator Interface Setups.)

Power Source

See page 12 for available models.

2 Interface (choose one)

- **a** SubArc Interface Digital OR Analog See page 12. Requires a SubArc control cable to connect power source to interface. See page 9 for available cable lengths.
- **SubArc Remote Operator Interface** See page 12. Consists of SubArc Motor Control Digital and SubArc Remote Pendant Digital. Requires a Continuum motor cable and a SubArc control cable. See page 9 for available cable lengths.

3 Drive Motor

See page 12 for available models. Includes 4-foot (1.2 m) motor control cable. See page 9 for optional cable extension lengths and required drive rolls.

4 Torch (choose one)

- **a** Single-Wire See page 9 for single-wire torches, optional body extensions and required contact tips. See page 10 for optional wire straightener.
- **b Twin-Wire** See page 9 for twin-wire torches and required contact tips. See page 10 for optional wire straightener.
- o External Cladding Head (for use SubArc Strip Drive 100 Digital Low Voltage drive motor) See page 9.

5 Flux Hopper

See page 10. Includes 11-foot (3.3 m) flux hopper cable. See page 9 for optional cable extension lengths.

6 Reel/Spool Assembly

See page 10. Wire reel requires spool support assembly.

Manual Slide

See page 10.

Drive Rolls See page 9	
4a Single-Wire Torches, Straighteners and Tips	
OBT 600	
OBT 1200 043900 1,200 amps, 100% duty cycle, air cooled	
OBT Torch Body Extensions (if needed) See page 9	
1200-Amp Single-Wire Torch 301141 Short, 11.3 in. (288 mm), 1,200 amps, 100% duty cycle	
Single-Wire Straightener 199733 For single-wire torches	
Contact Tips See page 9	
Twin-Wire Torches, Straighteners and Tips	
Twin-Wire Torches, Straighteners and Tips 1200-Amp Twin-Wire Torches 301143 Short, 11.3 in. (288 mm), 1,200 amps, 100% duty cycle Long, 16.8 in. (427 mm), 1,200 amps, 100% duty cycle	
Twin-Wire Straightener 301160 301162 Single adjustment for twin-wire torches only Double/separate adjustment for twin-wire torches only	
Contact Tips See page 9	
Oladding Hand	
30–90 mm External Cladding Head 301167 3,000 amps, 100% duty cycle, water-cooled	
Flux Hopper and Cables	
5 Flux Hopper and Cables SubArc Flux Hopper Digital Low Voltage 300942 25 lb. (11 kg) flux capacity	
Flux Hopper Extension Cables (if needed) See page 9	
6 Reel/Spool Assembly	
Wire Reel 108008 For 60 lb. (27 kg) coil, requires 119438	
Spool Support Assembly 119438	
Slides	
Single Manual Slide 301137 7.87 in. (200 mm) travel adjustment
